The Ramo-Wooldridge Corporation
Los Angeles 45, California

Dear Sid:

Reference your proposal CMCC Doc. No. 151X5.11/49 dated 30 June 1958 for bonded spares stock to be maintained in the Contractor's plant for the repair and retrofit of Systems 1 and 3 for Requirement No. 3.

Reference proposal has been reviewed and approved by Requirement No. 3 with the following changes desired:

1. That the Contractor submit periodic status reports of the bonded stock inventory. Instructions for submission of the report will be forwarded directly to the Contractor by Mr. Denard.

2. That the bonded spares items listed in Exhibits A and B of referenced proposal be identified with "MP" numbers consistent with other spares listings to assist Requirement No. 3 in identifying all bonded spares. Contractors periodic status reports should also utilize these same "MP" numbers.

Very truly yours,

25X1

Contracting Officer

SUBJECT: Proposal for Bonded Spares

TO: Contracting Officer

Reference CMCC Doc. No. 151x5.1149 dated 30 June 1958, the contractor's proposal for a bonded spares stock to be maintained in his plant for the repair and retrofit of Systems 1 and 3 for Requirement No. 3. A copy of the proposal was forwarded to Mr. Denard for review, and his comments have subsequently been received.

The proposal is approved, and you are requested to authorize the contractor to procure, inspect, and store a stock of bonded spare parts and fabricated components as listed in Exhibits A and B to the referenced letter at a total cost not to exceed \$108,319.00. As stated in the proposal, any increase in this cost shall require additional authorization from the Contracting Officer. Please take whatever action is required to place the necessary funds on Contract No. A-101 to cover this work.

25X1

[] has expressed concern over the fact that this proposal does not include any provision requiring the contractor to submit periodic status reports of the bonded stock inventory. Where similar situations exist with other project contractors, a format has been forwarded to each contractor with the request to submit this report to the FOG depot on a quarterly basis. It is requested that the same requirement be placed on Ramo-Wooldridge with the understanding that [] will forward further instructions for submission of the report directly to the contractor.

25X1

One other change is recommended. R-W has not identified the bonded spares items listed in Exhibits A and B with "MP" part numbers consistent with their other spares listings. To assist the FOG depot in identifying all bonded spares, request that the contractor be directed to assign "MP" numbers to all bonded spares consistent with existing spares lists for Systems 1 and 3. The contractor's quarterly status reports should also utilize these same "MP" numbers
